

Stockholm  9-11 November 2009

FTP C 2009

From Research to Business

Newsletter FTP C2009 # 2 2009-06-05

More than 30 speakers!

The full programme for the FTP Conference is now available. It includes more than 30 presentations, focusing on R&D results that are already being used or that are close to be implemented by companies. Presentations are made by well known people from the industry, the research community and organisations in the sector.

The Programme and Organisation Committees proudly announce the complete list of speakers for the next FTP conference. The programme is now available on the FTP C2009 web site, www.FTPC2009.se.

As the theme for the conference is "From Research to Business" high efforts have been put on finding concrete results. The list of speakers is a mix of people from industry, funding organisations and research organisations, all well known in the sector. A total number of more than 30 speakers will in 10 minutes each give examples of research projects that have led to new or enhanced businesses.

The conference starts with key note speeches by Swedish Forest minister Eskil Erlandsson followed by industrialist Marcus Wallenberg. Following are four sessions about *Innovative products, Manufacturing processes, Availability of forest biomass and Sustainability and the societal perspective*.

In the closing session information from WoodWisdom-Net and other ongoing projects will be given. As the next EU Commissioners are still not known, this is the only open part of the programme. After the conference there are four different study tours you can attend.

At our website www.FTPC2009.se you will find updated information about the conference.
